  State of security of Android banking apps in Poland

Want to become a sponsor?

Help us to keep the event free of charge for all participants by becoming a sponsor. Various sponsoring opportunities are available. Contact symposium@usmile.at if you are interested.

Android Security Symposium

The Android Security Symposium brings together people from different backgrounds (academic, industry, rooting/exploiting community) who are interested in and actively working on Android device security. The event will feature exciting expert talks on various topics around Android and mobile device security and privacy. The symposium is an ideal platform to discuss current and upcoming security developments in Android and provides various networking opportunities.

08 - 10 March 2017 • Vienna, Austria • https://usmile.at/symposium

The Android Security Symposium is organized by the Josef Ressel Center u'smile at the University of Applied Sciences Upper Austria in cooperation with SBA Research and the Institute of Networks and Security (INS) at Johannes Kepler University Linz.
